NOTES:

*Class A Customs of Elkhart, Indiana Manufacturers Fresh and Gray Water Holding Tanks Tanks are made From NFS and FDA Approved Materials, it's called [DOW NSF International NSF/ANSI Std G1 approved Medium Density Polyethylene \(MDPE\) Resin](#)

They sell fittings, hose, water pumps and way to fill the tank that I might be able to use with my unit - gotta check to verify what I need with my builder and inspector then check on the website. Class A Customs won't know what I am needing because they aren't helping build my unit.
